

Greenhouse gas management
in European land use systems

FP7 Project GHG-Europe
Grant agreement No 244122

Deliverable D1.3			
Title	Complete driver maps for forest type, forest age class distribution, harvest and disturbance for Europe for past, present and future		
Delivery date from Annex I (project month)	18		
Actual delivery date	forest age class maps, raw data and a deliverable report draft uploaded 25/08/2011(month 20)		
Lead participant	WP	Nature	Dissemination level
EFI (22)	1	R	RE

Deliverable description

Historical age-class distribution data has been compiled. Gaps between inventories and missing data back to 1950 have been reconstructed using the forest age-class back-casting method by Seidl *et al.* 2011. Grid cell level 0.25 x 0.25 ° maps have been created for forest area in age classes 1-20, 21-40, 41-60, 61-80, 81-100, 101-120, >121 in the years 1950, 1960, 1970, 1980, 1990, 2000, 2010.

The deliverable report draft describing the reconstructed forest age-class distributions will be updated and finalised during September 2011. Other variables describing forest management are planned to be added together with future projections later in 2011.

D1.3 is available at <ftp://ftp.bgc-jena.mpg.de/pub/outgoing/etomell/GHG-EU/forest/>
